hyperlink. Notes are just also drag and drop, and can be stored or synced to your favorite cloud service you choose. And also, users like that iNote is very easy to use and light-weight. It does not take up too much space on your PC, and it takes a very short time to download and install. You can also buy the

premium version to remove Ads and to save 100 MB. It's a must-have Windows 10 app for both Windows 10 mobile and Windows 10 PC. The app is very easy to use with some great options in front of you in iNote for Windows: Create unlimited Notes Notes have never been this simple in Windows,

where you can easily create unlimited numbers of notes and mark them as favorites. They can be in any order and be easily synchronized with your favorite cloud service. Take Pictures and Notes While Typing The best Windows 10 note taking application allows you to take notes even while

you're typing. No need to stop using other programs to take a note. Every time you type something, you can easily make a note. Take Notes and Upload Them to Favorite Cloud Services iNote for Windows easily allows you to create any notes on the fly and save them in any order to

With this desktop application, it's possible to create your own note book, and store any necessary information. It doesn't matter if it is personal or business-related data, and there are plenty of options to customize the way you write down your text. You can have notes,

links and images of any size and color available to the content of the note. How to Use : Start the program from the desktop shortcut and follow the instructions. You can use the list of hotkeys to add links to your notes, or give the application a macro that copies content in any kind of format. What

Features Can Be Used? You can create your own custom notes, and you can also include links to websites and documents. You can style the appearance of the notes with text color, font and size. You can also include images in your notes, and resize them according to your needs. System

Requirements : There are no requirements listed for the program. For Beginners : You don't need to have any programming skills in order to use this program, as you just need a blank note book. You can have the notes saved locally and locally open when launching the program. Installation

Details : Users can find the program on their desktop, and launch it after downloading the archive. This program has a standard setup, and most of the required entries are already configured when launching the program after installation. Program Site Link : WinIP [1.8.8.3 beta] First and

foremost, WinIP is a utility for speed dialing. The application is rather small when it comes to displaying the IP addresses of contacts. In fact, there's no login on the homepage, and you're immediately taken to it if you click on the "Start Dialing" option. From there, you can view all information

concerning a contact, and click on the address in order to speed dial. The interface is quite simplistic, offering two columns with the latest IP info, a bit of space for the profile, and a button to show or hide the contents. It's rather easy to navigate since the information is displayed in a relatively logical

way, and it's pretty straightforward to distinguish between the dialing and the contact detail page. It's
